

What Time Is It? Board Game

Materials: one number cube, one mini-clock per player, and game pieces (colored cubes or chips) one for each player

Number of players: Two or more players. Roll the number cube to determine who moves first. (The player with the lowest number will go first, then the next highest number and so on.)

How to Play: Each player rolls the number cube to determine the number of spaces to move. Each player is to use the mini-clock to show the time described on the space he/she lands on or follow the directions on the space on which he/she lands. The first player to reach the finish line is the winner.

NOTE: If the player does not show the correct answer on the clock, he/she loses his/her turn.
